Anger & Hostility

Presented by Dr. William C. Williams
Professor of Psychology, Eastern Washington University

Thursday, March 17, 2016
N201 – 10:30 am – 11:20 am

This presentation will make distinctions between hostility, aggression, and violence, with emphasis on the causes: environmental, developmental, and biological. The main focus will be on overtly aggressive behavior, such as physical violence and threats of violence. Among the topics to be addressed are sex differences in the commission of violent acts, the appearance of aggressive behavior during early childhood, and origins of psychopathy.

William C. Williams, Ph.D. is a Professor of Psychology at Eastern Washington University. He earned his Ph.D. in Experimental Psychology from the University of Utah. Dr. Williams is the recipient of many awards, including the National Re-Design Scholar from the National Center for Academic Transformation (NCAT). His interests include human psychophysiology with an emphasis on emotion, attention, and the psychophysiology of personality and personality disorders.
