The Bachelor of Applied Arts in Interior Design (BAA) offers a broadly-based and professionally-relevant curriculum that embraces the responsibility of preparing and inspiring the designers of the future. The BAA program provides a learning environment based on a foundation of holistic, creative problem-solving, and is accredited as a professional level degree by the Council for Interior Design Accreditation (CIDA). The BAA curriculum is an upper-division course of study for students who have completed a regionally accredited Associate of Arts degree or higher (or equivalent), in one of the following degree categories: Interior Design, Interior Architecture, Architecture or Industrial Design. The degree offers a combination of core courses, general education and electives that help students achieve their particular career goals.

LEARNING OUTCOMES

Students graduating from the BAA should have the skills and abilities to be employed by companies specializing in interior design services, including interior design and architectural firms who practice in commercial, institutional or residential interiors and space planning, provide furniture-related design and/or specifications, offer specialized consulting services, or participate in green-building and sustainable design projects.

Program graduates should be able to:

- Apply interior design principles and practices
- Recognize the implications of globalization on design practices and demonstrate an understanding of how social, political and physical influences shape the design of built environments
- Utilize the principles of lighting, acoustics, thermal comfort and indoor air quality to enhance the health, safety, welfare, and performance of building occupants
- Select and specify furniture, fixtures, equipment and finish materials on the basis of their properties and performance criteria, including environmental attributes, maintenance, installation, and life cycle cost
- Apply ethical and accepted standards of practice for project management, project communication, and project delivery
- Demonstrate leadership by engaging in multi-disciplinary teams representing a variety of points of view and perspectives collaborations, consensus building, and team-oriented activities
- Demonstrate understanding of laws, codes, standards, and guidelines that impact the design of interior spaces and protect the health, welfare and safety of the public, including fire and life safety, accessibility guidelines, and industry-specific regulations in the design of interior spaces
- Appraise the job market, create a search strategy and professional portfolio; leverage internship experience for career success; earn experience necessary to qualify for NCIDQ certification
